

Laboratory Supervisor | Tiris Ressources

Tiris Ressources SA, a subsidiary of Aura Energy, is recruiting an experienced Laboratory Supervisor to lead its laboratory function and build the in-country analytical capability of the Tiris Uranium Project in Mauritania.

About Us

Tiris Ressources is a subsidiary of Aura Energy Limited, an Australian Stock Exchange listed (ASX: AEE) uranium company with projects in Mauritania and Sweden. The near-term-production Tiris Uranium Project in Mauritania has significant opportunities for both resource and production-profile expansion. With the company poised to commence financing and ultimately construct and operate Mauritania's first uranium mine, this role will build the in-country laboratory capability on which the project's process control and metallurgical work will rely.

About the Role

Reporting to the Tiris Ressources General Manager Operations, you will supervise TRSA's laboratory, lead a team of Mauritanian laboratory technicians and take ownership of process-control analysis, sample management and QA/QC. Your first assignment is the laboratory of the company's pilot plant, working alongside the Pilot Plant Laboratory Manager. The role then grows with the project: the transformation of the company's Nouakchott laboratory into an accredited uranium analytical laboratory, and the establishment of the project site laboratory.

Based in Nouakchott with deployment to the pilot plant and project laboratories, this is a hands-on leadership role for a laboratory professional who wants to build the analytical function of Mauritania's first uranium mine.

About You

- Tertiary qualification in chemistry, chemical engineering, laboratory science or equivalent
- Minimum 5 years' experience in an industrial, mining or analytical laboratory, including 2 years supervising technicians
- Hands-on competence in wet chemistry and sample preparation; experience in QA/QC and structured data management (LIMS or spreadsheet-based)
- Experience in uranium, hydrometallurgical or process-control laboratories, and with laboratory quality systems (ISO/IEC 17025 principles), highly regarded
- Fluent in French; working proficiency in English
- Rigorous, organised and quality-driven, with the motivation to take ownership of the laboratory and develop a Mauritanian team

How to Apply

Please send your CV and a brief cover letter explaining why you are interested in this role to recruitment@auraeec.com

Applications close Wednesday 28 October 2026.
